About Me

Computer Science (Data Science) Engineer specializing in Artificial Intelligence, Machine Learning, Generative AI, LLMs, NLP, and Data Science. **Smart India Hackathon (SIH) 2025** National Finalist, recognized by the Ministry of Mines, Government of India, for designing and pitching an AI-powered Rockfall Prediction System. Proficient in Python, Java, SQL, Power BI, TensorFlow, and Git/GitHub, with hands-on experience in machine learning, data analytics, predictive modeling, and end-to-end software development. Combines strong technical expertise with leadership and teamwork as an **NCC Cadet and Promotional Lead at E-Cell, IES IPS Academy**.

Skills

Technical Skills:

- **Programming Languages:** Python, Java, SQL
- **Artificial Intelligence & Machine Learning:** Artificial Intelligence (AI), Machine Learning (ML), Generative AI, Large Language Models (LLMs), Natural Language Processing (NLP), TensorFlow, Scikit-learn, Prompt Engineering, Predictive Modeling
- **Data Science & Analytics:** Data Science and Analytics, Exploratory Data Analysis (EDA), Statistical Analysis, Data Visualization, Power BI, Pandas, NumPy
- **Development & Tools:** Git, GitHub, Firebase, Flutter, MySQL, Docker
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Software Development, Machine Learning Workflows

Soft Skills:

- Leadership, Team Collaboration & Agile Project Coordination
- Problem Solving & Analytical Thinking
- Communication, Technical Pitching & Stakeholder Management

Education

- **B.Tech in Computer Science (Data Science)** | IPS Academy, IES, Indore (RGPV) | Expected Graduation: 2027
- **Class XII (PCM)** | **Medi-Caps International School** | Score: 85.6%
- **Class X** | **Medi-Caps International School** | Score: 97.2%

Professional Experience

Data Analyst Intern | Elevate Labs | May 2025

- Executed end-to-end Exploratory Data Analysis (EDA) on large-scale datasets using Python (Pandas, NumPy) to isolate and uncover operational trends.
- Designed and deployed interactive Power BI dashboards, transforming raw data streams into automated, actionable business intelligence for key stakeholders.

AI/ML Intern | TechSolid Development | Sept 2025

- Collaborated on optimizing end-to-end machine learning workflows, focusing on predictive model development and pipeline deployment scripts.
- Utilized Scikit-learn and TensorFlow to build baseline architectures, analyze model evaluation metrics, and preprocess high-dimensional data.

Promotional Team Lead | E-Cell, IES IPS Academy | Jan 2025 – Present

- Led promotional campaigns that boosted participation by 40%; managed corporate sponsors and 500+ attendees.

Technical Projects

Nivaran – AI Smart Civic Intelligence Platform 🔗

- Developed an AI-powered civic intelligence platform that automates public grievance classification, prioritization, and routing using NLP and predictive analytics, while providing real-time dashboards and geo-spatial insights for data-driven governance.
- Designed a scalable multi-service architecture integrating citizen and administrative portals with AI-powered analytics, enabling efficient complaint management, hazard monitoring, and actionable decision-making.
- **Tech Stack:** Next.js, React, TypeScript, Node.js, Express.js, MongoDB, **Python, FastAPI, NLP, Machine Learning, Scikit-learn, Predictive Modeling**, Docker.

InsightIQ – AI-Powered Business Intelligence & Analytics Platform 🔗

- Developed an end-to-end AI-powered Business Intelligence platform that transforms raw CSV datasets into interactive dashboards, KPI analytics, visualizations, and actionable business insights using LLM-driven natural language to SQL generation.
- Engineered an intelligent analytics pipeline with automated data ingestion, profiling, cleaning, secure SQL validation, dynamic chart recommendation, query history, and CSV/Excel export for self-service business analytics.
- **Tech Stack:** React.js, FastAPI, Python, PostgreSQL, Pandas, Large Language Models (Ollama-Phi-3 & Qwen2.5), Prompt Engineering, Axios.

Handora – AI Gesture-Based Interactive Particle System 🔗

- Developed a real-time gesture-controlled 3D visualization system that leverages computer vision to recognize hand movements and generate dynamic particle simulations with interactive shape morphing.
- **Tech Stack:** Python, MediaPipe, Three.js, JavaScript, Computer Vision, WebGL, 3D Graphics, Real-Time Rendering.

Dashboards & Data Analysis

- Designed interactive Power BI dashboards and performed EDA on Iris, Titanic, and Netflix datasets to extract insights and patterns.

Achievements and Certifications

Awards & Achievements

- **National Finalist | Smart India Hackathon 2025 [Ministry of Mines]:** Developed an AI-powered Rockfall Prediction & Alert System (SIH25071)
- **2nd Position | UDAAN'26 Minor Project Exhibition [IPS Academy IES, Indore]:** Recognized for engineering Nivaran(AI-powered smart civic intelligence platform)

Professional Certifications & Simulations

- **Generative AI & Data Analytics** | TATA (Forage, Jan 2026)
- **GenAI Business Consulting** | BCG (Forage, Mar 2026)
- **Introduction to Data Science** | Commonwealth Bank (Forage, Apr 2026)
- **Data Analytics & Visualization** | Deloitte Australia & TATA (Forage, 2025–2026)
- **Technology Risk Frameworks** | EY (Forage, Mar 2026)
