

SAKSHI SHEOGEKAR

AI/ML Engineer | Data Scientist | Generative AI

📞 9109887298 | 📧 sheogeekarsakshi3@gmail.com | [🌐 LinkedIn](#) | [🐙 GitHub](#) | [🌐 Portfolio](#)

Professional Summary

Computer Science (Data Science) undergraduate specializing in AI/ML and Generative AI, with hands-on experience building end-to-end intelligent systems — from model training to deployment — using Python, TensorFlow, Scikit-learn, FastAPI, SQL, and Power BI. National Finalist, Smart India Hackathon 2025, recognized by the Ministry of Mines, Government of India, for an AI-powered Rockfall Prediction System. Experienced across machine learning, NLP, computer vision, predictive analytics, and LLM-powered applications, with open-source contributions (Google Summer of Code 2026) and leadership as an NCC Cadet and Promotional Lead at E-Cell.

Skills

Technical Skills:

- **Programming Languages:** Python, Java, SQL
- **AI & Machine Learning:** TensorFlow, Scikit-learn, PyTorch, Generative AI, Large Language Models (LLMs), Natural Language Processing (NLP), Prompt Engineering, Predictive Modeling, Computer Vision
- **Data Science & Analytics:** Pandas, NumPy, Power BI, Exploratory Data Analysis (EDA), Statistical Analysis, Data Visualization
- **Frameworks & Development:** FastAPI, Flask, React.js, Node.js, Docker, Firebase, Flutter
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Core Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Machine Learning Pipelines, REST APIs

Soft Skills:

- **Leadership & Collaboration:** Leadership, Team Collaboration, Agile Project Coordination
- **Professional Skills:** Problem Solving, Analytical Thinking, Technical Communication, Stakeholder Management

Education

- **B.Tech in Computer Science (Data Science)** | IPS Academy, IES, Indore (RGPV) | **Expected Graduation:** 2027
- **Class XII (PCM) (2023)** | Score: 85.6%
- **Class X (2021)** | Score: 97.2%

Professional Experience

AI/ML Intern | Elevate Labs | June 2026 – July 2026

- Engineered end-to-end ML pipelines for customer churn prediction and sales demand forecasting using classification and regression models in Python, TensorFlow, and Scikit-learn.
- Improved model accuracy from 84% to 89% through hyperparameter tuning and feature engineering, while reducing preprocessing time by 30% via an automated, reusable data-cleaning pipeline.
- Modularized the ML workflow with Git/GitHub version control, enabling faster iteration and easier handoff for future model retraining.

Data Analyst Intern | Elevate Labs | May 2025

- Performed EDA on 100K+ records using Python (Pandas, NumPy) to uncover trends that informed business decisions.
- Built 6+ interactive Power BI dashboards with automated KPI reporting, streamlining a previously manual reporting process.

Technical Projects

Nivaran | AI-Powered Smart Civic Intelligence Platform 🔗

- Engineered an AI-powered civic intelligence platform that automates grievance classification, prioritization, and routing using **NLP and Machine Learning**, enabling real-time, data-driven governance.
- Architected a scalable multi-service platform integrating citizen and administrative portals with **5+ intelligent modules**, including complaint management, geo-spatial analytics, hazard monitoring, and decision support dashboards.
- **Tech Stack:** Next.js, React, TypeScript, Node.js, Express.js, MongoDB, Python, FastAPI, Scikit-learn, NLP, Docker

InsightIQ – AI-Powered Business Intelligence & Analytics Platform 🔗

- Built an end-to-end AI-powered business intelligence platform that transforms CSV datasets into interactive dashboards, KPI analytics, and visual reports using LLM-powered Natural Language-to-SQL generation.
- Developed an automated analytics pipeline supporting data ingestion, profiling, SQL validation, dynamic chart recommendations, query history, and CSV/Excel export, significantly reducing manual analysis effort.
- **Tech Stack:** React.js, FastAPI, Python, PostgreSQL, Pandas, Ollama (Phi-3 & Qwen2.5), Prompt Engineering, Axios

Handora – AI Gesture-Based Interactive Particle System 🔗

- Developed a real-time AI-powered gesture recognition system using MediaPipe, Computer Vision, and WebGL to enable low-latency hand tracking and interactive 3D particle simulations.
- **Tech Stack:** Python, MediaPipe, Three.js, JavaScript, Computer Vision, WebGL, Real-Time Rendering

Achievements and Certifications

Awards & Achievements

- **National Finalist | Smart India Hackathon 2025 [Ministry of Mines]:** Developed an AI-powered Rockfall Prediction & Alert System (SIH25071)
- **2nd Position | UDAAN'26 Minor Project Exhibition [IPS Academy IES, Indore]:** Recognized for engineering Nivaran(AI-powered smart civic intelligence platform)
- **Open Source Contributor** | Contributed to open-source projects during **Google Summer of Code (GSoC) 2026**

Professional Certifications & Simulations

- **Generative AI & Data Analytics** | TATA (Forage, Jan 2026)
- **GenAI Business Consulting** | BCG (Forage, Mar 2026)
- **Data Analytics & Visualization** | Deloitte Australia & TATA (Forage, 2025–2026)
- **Technology Risk Frameworks** | EY (Forage, Mar 2026)
